## ABOUT

I am a hard working individual who can work well under pressure. I have held a variety of low level management positions, and I am able to collaborate well. I have been able to apply the skills I acquired from my time at UW-Stout as a design student to Web Design in a variety of different ways. My knowledge of programming is at a graduate level, but I am more than able to learn as I go. I learn skills efficiently by working hands on.
